July Breaks Record

Last month was a record breaker for low temperature; never before since the establishment of the local U. S. weather bureau forty-one years ago, have we had a July so cool. The average temperature for the month is 73.9 degrees, but last month it was 69 degrees and in July, 1914, it was 76 degrees.

The rainfall during the month was 4.66 inches, as compared with a little over one-half inch in July, 1914.

The excess of precipitation since January 1st, as compared with the average year, is 11.67 inches.

Preliminary Hearing Today

The preliminary hearing of Warren Soules and Wm. Beatty, Jr., charged with cattle stealing, with C. L. Hill as the complaining witness, will take place today in the county court.

Sheriff Salisbury was in Brady yesterday and subpoenaed twenty-one witnesses who are expected to give evidence in the case, about half of them for the prosecution, the remainder for the defense.

In addition to these witnesses a score or more other Brady residents are here as spectators, and the village is therefore well represented in town today.

The rainfall during the past week has been as follows: July 27th .26 inch, 28th, .01 inch, 29th 1.30 inches, 31st 1.03 inches, August 1st 1.25 inches. Corn, notwithstanding there has been a lack of hot weather, is growing very rapidly. It is generally considered that if killing frost is delayed ten days later than usual Lincoln county's corn crop will be considerably above the average.
